

# EASIER. CLEANER. FASTER.

## WAFFLETECHNOLOGY® BILL VALIDATOR CLEANING SYSTEMS

Ideal for cleaning your UBA®, WBA®, Taiko™ and DBV® validators used in gaming, amusement, lottery and vending equipment

---

Only JCM Waffletechnology® Cleaning Cards are designed to perfectly clean. Best of all, they only take one step to use – just insert and you're done. No keys, no opening any doors, no bill insert error reports. Waffletechnology® cards are the easier, cleaner, faster way to clean your validators.

---

### FEATURES

- Helps maintain high acceptance rate
- Cleans without opening equipment
- Cleans without removing the validator
- Easy one step cleaning

### BENEFITS

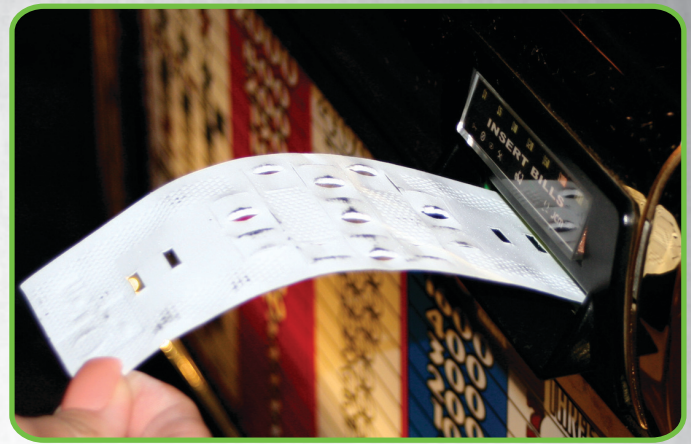

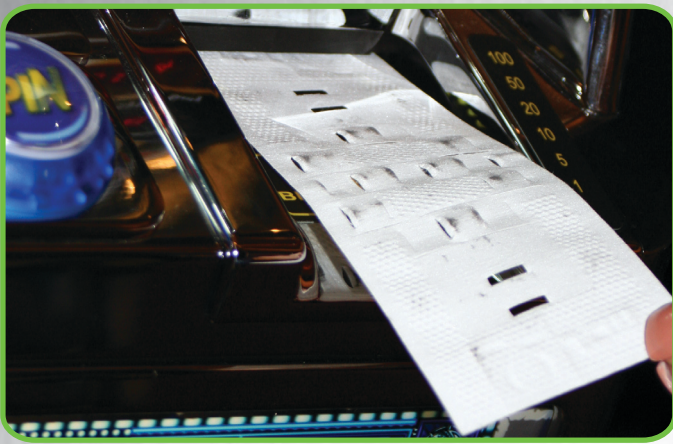

- Removes dust, dirt, oil and debris
- Reduces machine down-time
- Reduces security risk
- Reduces labor costs

## CARD ACCEPTANCE

- Cleans UBA®, WBA®, Taiko™ and DBV® validators.

## ENVIRONMENTAL PRODUCTS REMOVED

- Dust
- Dirt
- Oils
- Cigarette Smoke Residue
- Textile Fibers
- Paper Dust

## ONLINE SUPPORT

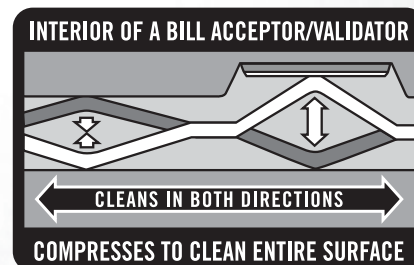

- Visit [www.jcmwaffletechnology.com/usage.html](http://www.jcmwaffletechnology.com/usage.html) to use the maintenance calculator. This will give you, based on specific information, the cleaning card benefits per bill validator.

## TECHNICAL SUPPORT

- Training classes and literature are provided for all JCM products.

## CONVENIENCE

- Waffletechnology® creates a card with front-and-back raised surfaces. These surfaces are essentially spring-loaded to give significant pressure to recessed cavities, cleaning optical sensor lenses and other internal components.
- Bill validators can be cleaned without opening the cabinet or removing them from the games, so machine downtime is greatly reduced while causing minimal disturbance to the casino floor.

## SECURITY

- Use of cleaning cards does not involve opening the machine under the watchful eyes of security and management personnel, greatly reducing the disruption to key employees and the distraction of patrons.
